on 3 October, the barracks installation on Schunke Lake, 1 km south of Kummersdorf, was occupied by about 40 to 50 soldiers who wore black-bordered black epaulets. On 26 September, 40 men were engaged in constructing a footbridge in the lake. No training activities were observed after that date. Comment. The information contained in paragraphs 1 through 4 of the present report confirms elements of the 2d Cds AAA Div statione in the Eisenbahnsionier Kaserne. The AA guns of a new type of which the two sources gave different descriptions, presumably are AA rocket launchers which were also observed by other sources in Frankfurt/Oder,						
of Kummersdorf, was occupied by about 40 to 50 soldiers who were black-bordered black epaulets. On 26 September, 40 men were engaged in constructing a footbridge in the lake.
